Refining Your Search

1. Refine results by using filters/limiters, e.g. resource type, publication year.

2. Select an article by clicking its hyperlinked title.
Refining Your Search

Use these Subject terms to find more relevant articles.

Read the Description (Abstract) to determine if the resource is relevant.

Use the options below to retrieve article or create the Citation of a source.
Summary: Review Results & Refine Search

1. Read the **Description (Abstract)** to see if the article is relevant. Note the number of times your keywords occur in the text. The more, the better.

2. Check the **Subjects** fields – they describe the content of the item. Use them to redo your search.

3. **Limit** by “Peer-reviewed Journals”, “Resource Type”, “Publication Year”, etc. to narrow the focus of your search.

4. Look at the **reference lists** of articles relevant to your search. They will lead you to additional sources of information on your topic.
Selecting a Database

To find specialized content, such as subject-specific information, or legal information, or financial data, use the Library databases.

Why We Cite?

- When we use other people’s words or ideas in our work, we need to acknowledge them. “Give credit where credit is due”.
- Ensures we avoid “accidental” plagiarism.
- Enables our reader to locate the sources themselves.
- Shows that we have done good research.
How We Cite?

- You need to cite each source twice:
  - In the text of your paper, at the point where you use someone else’s words or ideas. This is in-text citation (brief).
  - In the list of references.

- Collect citation details about a source from CityU LibraryFind, databases, and the Internet.

- Use citation tools to format and generate a citation: Citation Machine, the “Cite” feature in databases.

- Do I need to memorize the style? No. You simply need to follow the guidelines, and use these guidelines as a reference.
Studies have found that students use pretend play as a springboard to investigate art materials, their peers’ ideas, and the world outside the classroom (Katz & Mendoza, 2008). In Welsch’s (2008) classroom, which included play areas filled with props from popular story books, students relied on stories and props only as a framework for their play. Then, they developed more imaginative and personally relevant explorations of the stories’ meaning. Welsch states, “Play experiences available contributed to students’ development in multiple areas and may result in a positive influence on later experience with books and reading” (pp. 145-146). Similarly, in Brokmeier’s classroom, children developed other academic skills such as sorting and classifying; they used research techniques and secondary sources to develop their classroom zoo (Bowne & Brokmeier, 2008).

ACTIVITY 2: Cite it right
Citation Generator

- Good news! There are free citation generators that can assist you in creating citations in APA, MLA, Chicago, and more.
- One of them is *Citation Machine* –

  **Go to** [www.citationmachine.net](http://www.citationmachine.net)

  **Follow the steps below to create a citation:**

  - Select **Create citations**.
  - Select the required style *(APA)*.
  - Select the format *(journal, website, etc.)*.
  - Choose the **Manual entry mode**.
  - Put the elements into corresponding fields.
  - Click the “**Create Citation**” button.
Citing a Web Document (Demo)

- We will cite an article from a Internet website:
  https://www.psychology.org.au/for-the-public/Psychology-Topics/Anxiety

- Identify the below elements needed to construct the full citation of the article:

<table>
<thead>
<tr>
<th>Author (if any)</th>
<th>The Australian Psychological Society</th>
</tr>
</thead>
<tbody>
<tr>
<td>Title of web document/website</td>
<td>Anxiety disorders</td>
</tr>
<tr>
<td>Source/supplier of information (if any)</td>
<td>Year 2018</td>
</tr>
<tr>
<td>Internet address (URL)</td>
<td><a href="https://www.psychology.org.au/for-the-public/Psychology-Topics/Anxiety">https://www.psychology.org.au/for-the-public/Psychology-Topics/Anxiety</a></td>
</tr>
</tbody>
</table>

- Put the elements into corresponding fields in Citation Machine.
Plagiarism is ...

the act of using someone else’s words, ideas, or images without acknowledging the source, either intentionally or unintentionally.

You commit plagiarism if you:

- use the ideas of others, and fail to cite the source of the ideas, or give incorrect information about the source.
- directly quote someone else’s words, and fail to put the quote in quotation marks.
- paraphrase (rewrite), and copy many words or phrases from a source instead of using your own words.

**EXCEPTION:** Common knowledge needs no citing. This include easily observable information, known facts, e.g. Smoking is a health hazard.
